Student Grant Recipient Report – Guidance

This document is designed to help students to complete the Student Grant Recipient Report form.

The Ulrike Michal Foundation for the Arts (UMFFTA) is committed to supporting student artists as part of its mission. To help us gauge the effectiveness of your grant, your input is invaluable.

The numbers in brackets refer to the corresponding sections of the form.

- (1) The grant award date is the date on your student grant award letter.
- (2) The grant reference is the reference number on your award letter. The number starts UMFFTA SG.....
- (3) Please detail how you have spent your grant and highlight if there has been any variation from what was set out in your application and your justification for that change.
- (4) In this section you should set how you initially thought this expenditure would benefit you as a student artist. It might be helpful to quote from your original application.
- (5) In this section you should explain how the grant has actually benefited you as an artist and what it has allowed, enabled or encouraged you to do as an artist.
- (6) With the Foundation's particular focus on the traditional skills associated with the fine and decorative arts, this question is an opportunity to highlight if and how the grant has helped you developed these skills.
- (7) We welcome any suggestions you may have as a current student on how else the Foundation could support student artists.
- (8) Please say whether you would encourage other students to apply for a grant. If you would and are willing to supply a quote, that would be helpful. We would only use your first name and place of education in any publication such as on the Foundation's website.

Please provide at least three high resolution digital photographs as evidence of how the grant has benefited you as a student artist. We rely on your creativity as artists to think what images would symbolize how you have benefited.

Please send your completed student grant recipient report to info@umffta.org

Remember to put your project reference number in the subject line of your email
